JARA SANTAMARIA

Junior Full-Stack Developer

+44 07 543 789 258   jarasmar@gmail.com   **Linkedin: jarasmar**   **Github: jarasmar**

SUMMARY

I am a **Full-Stack Junior Developer** and life-long learner. I fluently speak three languages, worked on Makeup and Special Effects for Cinema and TV and have a degree in Visual Arts.

Recently graduated from **Makers Academy**, where I learnt TDD, Agile, and OOP like Ruby on Rails and JavaScript.

I would love to find a job as a Front-End or Full-Stack developer in an environment that supports my learning so I can keep growing and become a better developer everyday.

PROJECTS

Second Life
App based on Google Maps API where users can mark the exact location of any kind of goods left on the street for other people to collect.

‣ Tech Stack: Rails, JavaScript, Google Maps API, PostgreSQL, AWS, Bootstrap, Rspec.

‣ Links: Github - Demo

Hackathon Game
The app is a classic run and jump game built for a 2.5 days hackathon themed on key workers during Covid-19 crisis.

‣ Tech Stack: JavaScript, p5.js, CSS.

‣ Links: Github - Demo

Mix Tape
Final group project for Makers. First time using React for the front-end, Rails for the back-end and Spotify API. Combines selected user's top tracks to generate a playlist that can be played from the browser and saved in your account.

‣ Tech Stack: Rails, React, Spotify API, PostgreSQL, CSS, Rspec, Capybara.

‣ Links: Github - Demo
